

“CVe Monitors are the greatest tool for molders. The system is user friendly and it basically manages itself.”

Derrick Hardnett, Process Engineering Manager
ITW Automotive Fuel Systems Division

DATA DRIVEN ACTIVITIES

Fuel system components are critical, and so are the tools that produce these parts. That’s why ITW Automotive relies on Progressive’s exclusive CVe Monitoring platform:

“In 20 years of molding, I’ve seen many approaches for managing PM’s and work orders, and nothing matches CVe. Data is populated automatically, and alerts can be viewed in the office or on a phone for when a scheduled activity is due.”

Contact Progressive to join those who are applying automated technologies to drive their proactive mold management activities.
