Progressive Components Asia Celebrates 20th Anniversary

Visit Progressive at K 2019 for a chance to win a trip to Singapore F1®

Warrington, UK – Progressive Components Asia opened their doors in August of 1999 and plans to celebrate their milestone anniversary at K 2019 in Düsseldorf, Germany, 16 October through 23 October.

Progressive Components has been developing and distributing standard mould components to the Injection Mould Industry since 1987. The company has three locations in North America, inventory in Portugal, a wholly owned location in Singapore, and distributors throughout the world.

In recognition of Progressive Components Asia's 20th Anniversary, a trip to the Singapore F1® will be raffled at the event.

"The tooling industry has increasingly become a global market. Progressive's teams in Europe, Asia, and America are connected to assist companies in deploying their global tooling standards," states Glenn Starkey, President of Progressive Components. "With our familiarity in our "hometown" of Singapore, we look forward to being good hosts to a lucky winner for this global event."
