

*“Progressive’s Black Nitride Core Pins outlast all others 5 to 1. We trust these pins to perform in the harshest conditions.”*

Dan Sheridan, Twin City Die Castings

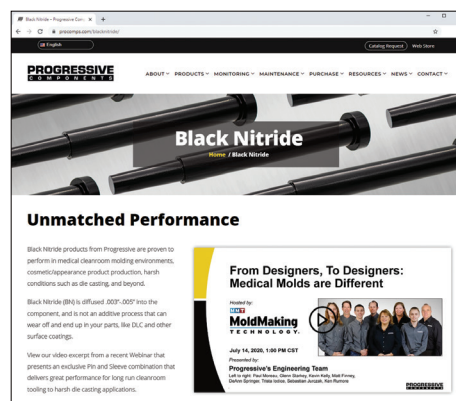

## UNMATCHED PERFORMANCE

After trying various coatings and treatments on core pins that would wear on every run, Twin City Die Castings have found Black Nitride Core Pins to be a problem solver:

- Black Nitride treatment is a high hardness diffusion, which won’t wear like DLC and other surface coatings
- Available on Ejector Pins, Core Pins, Ejector Sleeves, Leader Pins, and Bushings as off-the-shelf standards

Whether it’s for the harsh conditions of die casting or the greaseless demands of medical molding, access these profit-generating advantages exclusively from Progressive.
