

# WHICH COMPONENT SUPPLIER CAN YOU COUNT ON?

## TESTED AND TRUSTED

Leading U.S. mold builders know that a world class American mold cannot contain subpar components within. Other American brand boxes contain 'Made in China' components inside, but not Progressive, with performance results posted online after rigorous independent testing:

- Progressive's Counters still cycling at 3,000,000 shots versus copies failing at 152,000
- Progressive's Locks showing no wear at 2,000,000 cycles versus copies failing at 40,000
- Progressive's Pins survive harsh testing where others' galled and failed at only 1,700 cycles

With your name on the outside of your molds, trust the proven performance leader, Progressive Components. Visit [procomps.com/testing](http://procomps.com/testing) to see why.

# PROGRESSIVE COMPONENTS

PROGRESSIVE COMPONENTS

Progressive Components designs components for production tooling and distributes these worldwide. For all proprietary items, technical drawings are generated, housed, and updated at Progressive's US headquarters. Products are inspected in production and verified as required. Every effort is made to have dual supply to eliminate back orders, and shown below is the country of origin for these products.

Factors determining sourcing location include assurance of quality, expediency of supply chain, cost, and stability of the country. All products are labeled with the country of origin when they ship. Contact Progressive Components' Quality Department with any questions.

Item	Catalog Page	Primary Country of Origin	Secondary Country of Origin
Brass Cooling: Inlet Cascades	E-7	USA	USA
Brass Cooling: Bubbler Base	E-8	USA	USA
Brass Cooling: Threadless Waterline Plugs	E-23	USA	USA
Cables (Patch)	G-122	USA	USA
